DEVELOPMENT EXPERIENCE

Plan-it-Better - May 2017

https://github.com/planit-better/plan-it-better

   Plan-it-better is an event planning app specialized in contacting your entire guest list via text message or e-mail and keeping track of the event's budget. Final project for DevLeague, which had me as acting project manager responsible for initial wire framing, delegating tasks to my teammates and defining our minimum viable product in order to meet our two week deadline. Assisted in the creation of the database and API routing for this project and was responsible for deploying our app to the web.

React Kanban -March 2017
https://github.com/adavis001/React-Kanban

   An interactive to-do list that separates tasks into three separate columns: "Queue", "In Progress" and "Done". Users are able to add a new task with varying levels of priority and assign it to a specific person and dynamically change the status of individual tasks based on its progress.
